PROFESSIONAL SUMMARY

AI Engineer with 2+ years of experience spanning full-stack development and applied AI, specializing in agentic workflow design, automation, and cloud architecture. Proficient in Python and React, with hands-on experience in database systems, workflow automation, and monitoring dashboards. Passionate about agentic AI development, cloud infrastructure, and delivering consultative AI solutions that drive real-world impact.

WORK EXPERIENCE

AI Engineer, ALONZO AI

June '25 - Present | Hyderabad,Telangana

Project 1: NLP-to-SQL Search Platform (American College Football/Sports Analytics)

- Built backend architecture from scratch for an **NLP-to-SQL** search platform on team/player statistics, covering **prompt engineering, model benchmarking, API testing, and database design**
- Extended the platform with a **hybrid RAG chatbot** for query assistance, Stripe subscription integration, and **Redis caching**; frontend built in **TypeScript**

Project 2: CA (Chartered Accountant) Workflow Automation

- Developed an **automated system** using **Playwright** to log into user accounts and scrape financial data, storing structured records in **PostgreSQL with RBAC**-based access control
- Built a data management dashboard with **WhatsApp integration** for notifications; frontend built in **TypeScript**

Project 3: Medical ECG Prediction System (in progress)

- Researched **model evaluation techniques** to predict ECG waveforms and built a rule-based engine as part of Version 1, for early detection of cardiac shock types/pre-alarm conditions
- Now transitioning the rule-based engine to ML-based prediction, using **Azure/AWS** infrastructure for data storage; frontend built in **React**

Full Stack Developer, **FS Solutions**

Jan'25 - April'25 | Hyderabad,Telangana

- Built real-time chatbot backends with **Node.js & Socket.io**
- Developed **MERN** applications, improving frontend performance & reducing API response times by 30%
- Implemented Retrieval-Augmented Generation (**RAG**) pipelines for context-aware question answering using custom datasets
- Built and maintained **CI/CD pipelines** with GitHub Actions, Jenkins, and Azure DevOps
- Designed and managed cloud architecture across **AWS and Azure**, supporting scalable deployment of ML models and full-stack applications
- Gained hands-on exposure to **DevOps practices**, including containerization and pipeline monitoring, to support smooth release cycles

PROJECTS:-

Virtual AI-Powered Interview Application

Tech Stack: React, Python (Grok AI LLM), PostgreSQL, Whisper

- Developed an AI-driven interview simulation using Grok AI LLM & Whisper for sentiment analysis.
- Prompt driven backend with modular components
- Integrated OpenCv libraries and Pytorch modules for human sentiment detection and analysis
- Developed dashboard and screens with Typescript following all the best practises.

RAG BOT: PDF Q/A) [GITHUB](#)

Tech Stack: Python, OpenAI API, Langchain, FAISS, React

- Built an AI-powered document search system with Langchain & OpenAI API.

KitUp: A MERN Stack Microservices App [GITHUB](#) [LIVE](#)

Tech Stack:- React, Nodejs, MongoDB, AWS

- End to End full stack application with auth, payments, products and cart services following the microservices architecture.
- Implemented caching using Redis and used Cloudfront to serve media content

Persona Chat: Real-Time Communication with Node.js & WebSockets [GITHUB](#)

Tech Stack: WebSockets, Redis, VanillaJs, React, NodeJs

- Built a real-time chat app using Node.js & Socket with private & group chat features.
- Group Voice call feature integrated to the chatroom

React Native Application with Expo | Rentie (100+ users)

Tech Stack: React, Appwrite, Twilio, Firebase, Azure Cloud Functions

- Built a React Native app with customer & admin dashboards (100+ users).
- Integrated Twilio OTP & Appwrite Cloud Functions for automated SMS invitations.

ACTIVITIES

Mentorship

AlonzoAI, 2026

- Trained 50+ students (offline & online) in Linux, Shell Scripting, Python, AWS, and DevOps, enhancing technical proficiency and problem-solving skills.
- Delivered structured modules, improving automation, cloud computing, and scripting expertise while fostering effective communication, teamwork, and leadership.

Trainee

[FS Academy](#)

- Trained 50+ students (offline & online) in Linux, Shell Scripting, Python, AWS, and DevOps, enhancing technical proficiency and problem-solving skills.
- Delivered structured modules, improving automation, cloud computing, and scripting expertise while fostering effective communication, teamwork, and leadership.

Open Source Contributor

[Hack Revolution 2023](#)

- Developed and deployed a *Python-based image processing application* on AWS, enabling real-time photo analysis and secure database storage.

EDUCATION

Bachelor of Engineering in Computer Science

- Osmania University

2020 - 2024
Hyderabad, Telangana
